

CASE STUDY

AN INNOVATIVE SOLUTION FOR ORGANIZATIONS TO SUBMIT THEIR CREDIT DATA

Overview

Our client is a leading Property Management, Investor and Developer in the Middle East region. They have a significant presence in the UAE and are known for their quality and commitment.

Real estate companies in the UAE use the services of **Al Etihad Credit Bureau (AECB)** to assess the financial standing of their potential customers, be it an individual or a company. As part of their continuous improvement, AECB accepts their data in XML Format and Encrypted.

Our client was looking for a team to develop an Application Software to convert files to XML Format and encrypt them for easy uploading to the AECB portal.

They approached Varishtha Infotech to assist them in this project.

Requirement

The requirement of this project was the develop a Software Application that:

- Converts files into XML Format
- Encrypts files using Encryption Software

Application Features

After thorough analysis, Varishtha Consultants designed and developed an application software:

- Subject Individual and Subject Company entries can directly be entered into the application and saved
- Files are readily converted into XML format and encrypted through the application itself
- Entries can be edited as per client need or as per AECB requirement
- Error files as provided by AECB can be edited and re-encrypted in the application
- Reports can be downloaded for compliance

Outcome

- Varishtha Infotech successfully designed and implemented the Application for the client
- Client no longer has to rely on excel for recording entries
- Client does not have to use multiple applications for entry recording and file encryption
- This application has resulted in massive time savings for the client
- The process has further been streamlined
- Files as outcome of the application have been reviewed and approved by AECB
